Pierre-Louis Tharaux is Research Professor at INSERM, The Paris Cardiovascular Centre – PARCC and appointed by the Division of Nephrology, Georges Pompidou European Hospital, AP-HP, Paris.

He obtained an MD at the Paris Descartes University in Paris (1998). He was registered as a Nephrologist in 1998 and obtained a PhD in 2000 (Pierre et Marie Curie University, Paris). He received postgraduate training for two years at Duke University Medical Center, Durham, NC (Thomas M Coffman) and the University of North Carolina (Bev Koller). He recently spent a year as Senior Fellow at the Freiburg Institute for Advanced Studies, Freiburg, Germany.

He is an elected member of the INSERM Scientific Committee on Physiology and Pathophysiology (CSS3)(2016-2020). He is a councillor of the French Society of Cardiology/GRRC (2013-present) and of the French Society of Hypertension (2017-present) and the French Federation of Cardiology (FFC) (2017-present) and acted as a member of the Scientific Program Committee for several international scientific meetings.

As an ERC Investigator, Pierre-Louis Tharaux performs high risk/high potential benefit research in areas of major medical need.

Research in his laboratory involves the analysis of vascular and renal pathophysiology with translation to clinical studies, with a particular emphasis on genes or pathways implicated in disease tolerance.
