Visioconférence

Jessica Gobbo received her PhD in Life Sciences (Molecular and Cellular Biology and Oncology) from the University of Burgundy (Dijon, France) and her Master 2 in Business Administration (MBA, IAE, Dijon) in 2013.

Since 2013, her research within the INSERM1231 unit focuses on extracellular vesicles in cancer.

In 2014, she joined the medical team of the early phase unit of the Georges-François Leclerc anti-cancer center (Dijon). She coordinates different clinical trials on extracellular vesicles as biomarkers in cancer. She is co-founder of the East Extracellular Vesicle Network (REVE) and Nanodiag.
